

CALTEX

DEPENDABILITY AFTER 15 000 HOURS. JUST ANOTHER DAY IN THE LIFE OF DELO®.

Concord Namibia Plant and Crane Hire is a company that rents out forklifts, cranes and trucks. They cannot afford any equipment downtime, thus reliability and dependability are exactly what workshop manager Shaun Pretorius wants, and he gets it by using Caltex Delo® 400 MGX SAE 15W-40. He relies on Delo® to provide protection for all their vehicle engines and has never been let down.

Shaun says, "we have never seen any carbon build-up in our engines since using Caltex Delo® 400 MGX SAE 15W-40. Some of our clients push our equipment to the limit, but we have never experienced any failures on our equipment." Rented forklifts usually have to be taken out of commission after 10 000 hours. Yet despite Concord Namibia Plant and Crane Hire's equipment being over 15 years old, they're still running after more than 15 000 hours in service.

That's the Delo Effect

Shaun Pretorius
Workshop Manager,
Concord Namibia Plant and Crane Hire
