

CALTEX

BOTH RELIABILITY AND PERFORMANCE. AND THE ONLY CATCH IS IN THEIR NETS.

“Our business cannot afford any downtime. It doesn’t matter how expensive your fishing vessels are if they’re not on the water! Reliability and performance are key, with quality lubricants giving our fleet maximum uptime,” says Noel Jankowitz, Fleet Manager of Freddie Fish Processors. That’s why his 100% Namibian-owned company chose Caltex Delo®. “Using Caltex Delo® Gold Ultra SAE 15W-40 in our engines resulted in maximum fishing time with no equipment breakdowns, and keeps our fleet performing at optimum levels.

“In fact,” says Noel, “our Cummins K19 engine in MV Oupa Frank was overhauled after 34 000 hours in service and the crankshaft required no machining, and this was still in OEM specifications.” When an engine can be reassembled and put back into service with minimal replacement parts you know you have a lubricants partner you can trust.

That’s the Delo Effect

Engine reassembled and put into service.

Crankshaft and connecting rods after more than 30 000 hours – still within OEM specifications.
